Notes to the Annual Financial Statements

of Volkswagen Bank GmbH, Braunschweig, for the Year Ended December 31, 2016 Registration court: Braunschweig Commercial register number: HRB 1819

L General Information

The annual financial statements have been prepared in accordance with the requirements of the Handelsgesetzbuch (HGB – German Commercial Code) and the Verordnung über die Rechnungslegung der Kreditinstitute (RechKredV – German Bank Accounting Regulation).

Volkswagen Bank GmbH entered into a profit and loss transfer agreement with Volkswagen Financial Services AG, effective January 1, 2002.

Under section 285 no. 21 of the HGB, Volkswagen Bank GmbH is subject to an obligation to disclose material related party transactions that have not been conducted on an arm's-length basis. All transactions with related parties have been conducted at arm's length.

II. Accounting Policies

Assets and liabilities are measured in accordance with the provisions in section 252ff. of the HGB and additionally in accordance with those in section 340ff. of the HGB. Unless otherwise stated, the accounting policies are the same as those applied in the prior year.

Foreign currency transactions in the non-trading portfolio are measured in accordance with section 340h, in conjunction with section 256a, of the HGB. In compliance with Volkswagen Bank GmbH's risk strategy, the portfolio of assets, liabilities and forward contracts specifically hedged in accordance with section 340h of the HGB includes all material transactions denominated in foreign currency. These items are measured using the middle spot rate at the reporting date. Income and expenses arising from the translation of foreign currency exposures specifically hedged in the same currency are recognized in the income statement.

Foreign currency assets and liabilities that are not specifically hedged in the same currency are translated at the middle spot rate at the reporting date in accordance with section 256a sentence 1 of the HGB and in compliance with the historical cost convention and the principle of imparity (whereby unrealized losses are recognized but unrealized gains are not). If the items have a residual maturity of one year or less, the net gains or losses from translation are recognized in full in the income statement in accordance with section 256a sentence 2 of the HGB.

Currency forwards in the non-trading portfolio that are intended to hedge interest-bearing balance sheet items and that have not yet been settled as of the reporting date are measured and recognized by applying a split forward rate method. In this method, the forward rate in the contract is broken down into its two components: the spot rate and the swap rate, the latter being the forward premium or forward discount. The forward premium or discount is allocated and recognized over the term of the forward contract in the same way as interest. The spot rate component is measured by comparing the spot basis in the forward contract with the middle spot rate at the reporting date. Positive and negative spot rate differences within the same currency are offset against each other. The net amount is reported as an adjustment item from foreign exchange transactions under the "Other assets" or "Other liabilities" item.

Interest rate and currency derivative transactions entered into by Volkswagen Bank GmbH are used as part of general economic hedges. The Company does not make use of the option to apply specific hedge accounting arrangements.

Volkswagen Bank GmbH has acquired all of the following asset-backed securities (ABS), which are its own securitization transactions: Private Driver 2015-1, Driver Master Compartment 2, Driver Master Compartment 3, Driver Master Compartment 4, Driver Master Compartment 5, Driver Master Compartment 6 and Driver Master Compartment 7. Under the principles specified in IDW ACP HFA 8, significant credit risks thus remain with Volkswagen Bank GmbH. There has been no transfer of the beneficial ownership in the receivables underlying these ABS transactions, and these receivables therefore continue to be reported under loans to and receivables from customers. A miscellaneous liability is recognized in the amount of the purchase price received. With the forwarding of the payments from the sold receivables, this liability is reduced on a pro rata basis in the amount of the change in the present value of the underlying receivables. The difference compared with the payments received is recognized as an interest expense. No subsequent measurement is carried out for purchased securities derived from the Company's own securitization transactions because these transactions securitize the Company's own receivables and any counterparty default risk is already recognized as part of the measurement of the receivables concerned.

Items of property and equipment with finite useful lives are depreciated, and intangible assets with finite useful lives amortized on a straight-line basis on the basis of their useful lives. They are initially recognized at cost. The useful lives applicable to goodwill, which are based on economic useful lives, are eight years (VWV Retail) or two years (Volkswagen Finance s.a., France).

Straight-line depreciation is applied to vehicles reported under the "Lease assets" item in accordance with expected useful lives. They are initially recognized at cost. If property and equipment, intangible assets, or lease assets are identified as impaired and this impairment is likely to be permanent, the carrying amounts of the assets concerned are written down to fair value. When vehicles recognized as lease assets are sold, the proceeds are recognized under leasing income and the derecognized residual carrying amounts are reported under leasing expenses.

Long-term equity investments are reported at cost, while receivables are recognized at their principal amounts, net of provisions for credit risks. In dealer financing, specific valuation allowances are recognized on a contract-by-contract basis. Global valuation allowances are also recognized to cover risks arising in connection with dealer receivables for which no specific valuation allowances have been recognized. In retail financing, the provisions for risks take the form of specific valuation allowances evaluated on a collective basis. The model used to determine valuation allowances has been derived from the regulatory risk quantification method. Liabilities are recognized at the settlement amount. Differences between the amount received and the nominal amount are recognized in prepaid expenses or deferred income and then amortized over the maturity of the liability concerned. Equities and shares in affiliated companies are measured at the lower of cost and fair value. The cash reserve is carried at the nominal amount.

Provisions are measured using the best estimate of the amount required to settle the obligations concerned.

Some of the pension commitments are direct pension commitments, while others are funded through Volkswagen Pension Trust e.V. The commitments funded through Volkswagen Pension Trust e.V. are unit-linked pension commitments. Their amount is determined on the basis of the fair values of the associated securities in accordance with section 253(1) sentence 3 of the HGB. The fair value of the securities is offset against the funded provisions in accordance with section 246(2) of the HGB.

Other pension obligations (time asset bonds) also linked to securities funds. Time asset bonds provide the opportunity to save for early retirement by acquiring time asset bond units. The securities measured at fair value are offset as plan assets against the corresponding provisions.

The pension provision that is not externally funded is recognized at present value.

The 2005 G mortality tables published by Prof. Klaus Heubeck are used to measure pension obligations. The provisions for pension obligations are discounted using an average discount rate in accordance with section 253(2) sentence 1 of the HGB. The pension obligation is no longer discounted using a discount rate determined on the basis of the average market interest rates of the past seven years published by Deutsche Bundesbank, but using Deutsche Bundesbank's discount rate of the past ten years, adjusted in accordance with section 253(2) of the HGB. The calculations include the assumption of a general residual maturity of 15 years for the obligations. The recognized provisions for pensions equate to the pension obligations net of the associated

plan assets, which are measured at fair value. If the value of the plan assets is higher than that of the pension provisions, the difference is reported as an excess of plan assets over pension liability.

Other provisions with a residual maturity of more than one year are discounted on the basis of the maturity concerned in accordance with section 253(2) of the HGB. The discount rates used are those published by Deutsche Bundesbank for the maturities concerned; the unwinding of the discount includes the inflation rates expected to apply over the relevant maturity.

The banking book of Volkswagen Bank GmbH was reviewed in accordance with IDW ACP BFA 3 to assess whether there was any need to recognize a provision for expected losses. The discounted cash flow method was used for the evaluation. The discount rate used to discount the cash flows included a component to cover risk costs still expected to be incurred together with a risk costs premium and administrative expenses. The present value determined in this way was then compared against the carrying amounts recognized in the HGB financial statements for the assets in the banking book. There were no indications that the recognition of a provision for expected losses was required.

Securities in the liquidity reserve that are measured using parameters derived from the market are recognized at the lower of cost and market under the strict HGB definition.

All identifiable risks have been adequately provided for in the annual financial statements by the recognition of specific valuation allowances and provisions. Latent risk in the lending business is covered by global valuation allowances.

In the reporting period, the negative interest from financial assets and the positive interest from financial obligations are reported separately in the income statement as interest anomalies as there were further increases in these amounts year-on-year. This method of presentation makes the composition of net interest income more transparent.

BONDS AND OTHER FIXED-INCOME SECURITIES

To help safeguard the supply of liquidity, Volkswagen Leasing GmbH and Volkswagen Finance S.A., Madrid, have set up ABS structures. However, not all the securities issued by the special purpose entities purchasing the assets concerned have been sold to investors. Instead, some of the securities have been purchased by Volkswagen Bank GmbH and pledged as collateral for its participation in the open market operations of Deutsche Bundesbank. The total portfolio of these securities amounts to €909,617 thousand (previous year: €321,411 thousand). All the securities involved are allocated to the liquidity reserve. They are measured at the lower of cost or market value under the strict HGB approach. Although these securities are marketable and listed, the Company uses its own valuation model to determine their value because the market for the securities is insufficiently liquid. In this model, the cash flows determined for the securities are discounted using a standard swap yield curve for the Volkswagen Group plus a credit spread. The credit spread is validated using an indirect method based on indicative prices from various banks.

To accumulate collateral for participation in open market operations and to ensure that requirements in accordance with the liquidity coverage ratio are satisfied in the future, the Bank made repeated purchases of European government bonds with strong credit ratings. As of the reporting date, these bonds amounted to a total of €2,071,512 thousand (previous year: €2,127,629 thousand). The securities are classified as current assets and measured at the lower of cost or market value under the strict HGB approach.

PROVISIONS FOR PENSIONS AND SIMILAR OBLIGATIONS

The pension obligations are determined annually by an independent actuary using the projected unit credit method.

The main measurement assumptions and parameters applied in the actuarial calculations by Volkswagen Bank GmbH for 2016 were as follows:

	Germany	Other countries
Discount rate	4.01%	4.01 - 4.06%
Expected rate of salary increases	3.60%	0.00 - 0.08%
Expected rate of pension increases	1.50%	2.63 - 3.30%
Employee turnover rate	0.95%	0.00 - 1.50%

For Germany, the discount rate applied was the discount rate of 4.03% published by Deutsche Bundesbank for November 2016 in accordance with section 253(2) of the HGB (average market interest rate for the past ten

years) less a markdown of 2 basis points reflecting expectations of a further fall in interest rates at the end of the year. The discount rate used was therefore 4.01%.

For reasons of materiality, the actuarial assumptions used for other countries are reported as a range of values.

Securities funds with a value equivalent to a settlement amount of $\le 2,899$ thousand were offset against the liabilities for pensions and similar obligations. These securities amounted to $\le 3,004$ thousand at cost but their fair values totaled $\le 2,899$ thousand as of the reporting date. The securities were measured at closing prices as of the reporting date.

Expenses of \le 53 thousand from the measurement of the funds at fair value were offset against interest income from provisions of \le 53 thousand as part of the netting of the obligation (measured at the fair value of the securities) and the corresponding securities funds.

In the year under review, the difference for Germany determined in accordance with section 253(6) of the HGB amounted to €3,208 thousand for the pension provisions not funded externally and €202 thousand for the commitments funded through Volkswagen Pension Trust e.V. The difference determined in accordance with section 253(6) of the HGB amounted to €108 thousand for the Bank's branch in Italy, €366 thousand for its branch in the Netherlands and €779 thousand for its branch in the UK. Because of an existing profit and loss transfer agreement, the amount is transferred to Volkswagen Financial Services AG in accordance with the letter published by the German Ministry of Finance (BMF) on December 23, 2016, "Änderung des § 253 HGB durch das Gesetz zur Umsetzung der Wohnimmobilienkreditrichtlinie und zur Änderung handelsrechtlicher Vorschriften; Auswirkung auf die Anerkennung steuerlicher Organschaften" (Amendments to section 253 of the HGB on the basis of the Act Implementing the Mortgage Credit Directive and Amending Provisions of the HGB; impact on the recognition of tax groups).

OTHER PROVISIONS

Other provisions mainly comprise provisions to cover costs associated with litigation and legal risks. The provisions for litigation and legal risks of €278,887 thousand (previous year: €245,581 thousand) reflect the risks identified as of the reporting date in relation to utilization and legal expenses arising from the latest decisions by the courts and from ongoing proceedings. Provisions of €34,836 thousand (previous year: €32,635 thousand) were also recognized for indirect residual value risks and for risks in connection with the lending business.

SPECIAL TAX-ALLOWABLE RESERVE

The special tax-allowable reserve was recognized in accordance with section 3 of the Zonenrandförder-ungsgesetz (ZRFG – German Border Regions Development Act). Net income was increased by a reversal in the reporting period of €43 thousand (previous year: €43 thousand).

SUBORDINATED LIABILITIES

The total portfolio of subordinated liabilities amounts to €30,000 thousand (previous year: €30,000 thousand). Subordinated liabilities amounting to €29,358 thousand (previous year: €29,585 thousand) are deemed to be a component of equity under the provisions of article 62(a) of the CAPITAL REQUIREMENTS REGULATION (CRR).

The overall portfolio includes subordinated bonds in the amount of €30,000 thousand (previous year: €30,000 thousand), which have been placed on public capital markets.

There are no early repayment obligations for the subordinated liabilities.
