In the absence of any indication to the contrary, all figures shown in the tables have been rounded in accordance with standard commercial practice. Accordingly, minor discrepancies may arise if they are aggregated. A hyphen “-” in the table denotes the absence of any figure for the item in question. If the figure is less than €1 million after rounding, a zero is inserted.

Foreword

The Pillar 3 Disclosure Report for the period ended September 30, 2023 is published in accordance with the supervisory law requirements of the Basel III framework (Regulation (EU) No. 2019/876 – the Capital Requirements Regulation or “CRR II” – of the European Parliament and the Council of May 20, 2019 to amend Regulation (EU) 575/2013 (CRR)).

Effective July 27, 2019, the CRR was updated by CRR Amendment Regulation (EU) 2019/876. As Regulation (EU) 2019/876 is an amendment to Regulation (EU) 575/2013, this document uniformly uses the term CRR. Unless otherwise specified, the term CRR always refers to the most recent version that was amended by Regulation (EU) 2020/873 of the European Parliament and of the Council of June 24, 2020 and has been in force since June 27, 2020.

The Regulation is supplemented with the Implementing Technical Standards issued by the European Banking Authority (EBA) EBA/ITS/2020/04 of June 24, 2020 and the corresponding Commission Implementing Regulation (EU) 2021/637 of March 15, 2021, which provides further information on the tables included in the report. This Report is based on the legal requirements in force as of the reporting date.

The entry into force of the CRR provided in large measure a uniform legal basis for European banking supervisory law. The requirements of the CRR largely replaced the disclosure obligations regulated at national level.

Volkswagen Bank GmbH acts as the parent of the institution group for supervisory law purposes and is responsible for implementing the requirements of supervisory law within the Group. This also includes the obligation to make regular disclosures in accordance with Article 433 of the CRR. Volkswagen Bank GmbH is classed as a large institution in accordance with Article 4 (1) 146 of the CRR and therefore observes the frequency requirements stipulated in Art. 433a of the CRR.

In accordance with Article 433 of the CRR, the Pillar 3 Disclosure Report is updated regularly to meet the requirements and published shortly thereafter as a separate report on Volkswagen Bank GmbH’s website in the Investor Relations section. All requisite disclosures are made solely in this report.

Where available, the format templates stipulated by the EBA guidelines as well as the implementation and regulation standards for the disclosure of the information in accordance with Section 8 of the CRR have been utilized.

The Pillar 3 report complies with applicable legal and regulatory requirements and has been prepared in accordance with the internal policies, procedures, systems and checks.

Management has approved this report for publication and confirmed that Volkswagen Bank GmbH has complied with the requirements of Article 431 (3) of the CRR.

Braunschweig, December 2023

The Management Board

Disclosure of Key Metrics

The necessity of regulating the banking sector is derived from the objectives of banking supervision. The main objective of government regulation by supervisory authorities is to ensure the proper functioning of the financial system. In particular, minimum capital and liquidity requirements for banks have been defined in an EU regulation (CRR). In addition, this regulation defines maximum leverage levels.

To monitor its equity ratios, Volkswagen Bank GmbH has a capital planning process which ensures compliance with the minimum regulatory ratios including in the event of increasing business volumes. Monitoring of the leverage ratio is also embedded in this capital planning process. Observance of the liquidity ratios is safeguarded through liquidity management.

The relevant key parameters for determining the minimum ratios for equity, liquidity and leverage as well as other relevant information are summarized in the table below. This table sets out information from the COREP report on regulatory own funds, total risk exposure and the capital ratios as well as the combined capital buffer and total capital requirements. In addition, it shows the leverage ratio, the liquidity coverage ratio (LCR) and the net stable funding ratio (NSFR).

Volkswagen Bank GmbH is required to publish a quarterly Pillar 3 report. Accordingly, the key metrics presented in the table relate to the current reporting period ending September 30, 2023 (Column A) and the previous quarters (Columns B to E).

Volkswagen Bank GmbH's total capital of €9,587.1 million is composed of Common Equity Tier 1 (CET1) capital of €9,585.7 million and Tier 2 (T2) capital of €1.4 million. The increase in own funds compared to December 31, 2022 is mainly due to the higher Common Equity Tier 1 capital. The changes in Common Equity Tier 1 capital are described in a separate chapter.

The total risk exposure amount of €52,617.4 million increased by €2,082.4 million compared to December 31, 2022 for volume-related reasons in connection with ordinary business operations.

The leverage ratio fell by 2.00 percentage points compared to December 31, 2022 to 12.68%, primarily due to the increase in the total risk exposure amount.

The liquidity coverage ratio (LCR) reflects the ratio between existing highly liquid assets and Volkswagen Bank GmbH's net liquidity outflows (difference between cash outflow and cash inflow) over a 30-day horizon. The liquidity coverage ratio must not be any less than 100%. The data contained in the table above shows the amounts applicable on the respective reference dates.

The net stable funding ratio (NSFR) indicates Volkswagen Bank GmbH's funding over a horizon of more than one year. NSFR is the ratio of the available amount of stable funding to the required amount of stable funding. It must not be any less than 100%. The data contained in the table above shows the amounts applicable on the respective reference dates.

Own Funds

PILLAR I REQUIREMENTS

The own funds of an institution or an institution group are measured by reference to the prudential capital ratios. In this connection, Volkswagen Bank GmbH must observe the minimum capital ratios defined in Article 92 of the CRR at both the level of the individual institution and at the consolidated level of the institution group. According to this, a Common Equity Tier 1 capital ratio of at least 4.5%, a Tier 1 capital ratio of at least 6% and a total capital ratio of at least 8% are required.

In addition, Volkswagen Bank GmbH must comply with the regulatory capital buffer requirements. These provide for a capital conservation buffer of 2.5% and the institution-specific, countercyclical capital buffer. The countercyclical capital buffer is normally between 0% and 2.5%. It is calculated as a weighted average of the countercyclical buffer rates determined in the individual countries in which the relevant exposures are located.

The capital buffers for globally or otherwise systemically important institutions do not apply to Volkswagen Bank GmbH.

PILLAR II REQUIREMENTS

In its capacity as the competent supervisory authority for Volkswagen Bank GmbH, the European Central Bank (ECB) can decide in the Supervisory Review and Evaluation Process (SREP) to impose a capital add-on that must be satisfied in addition to the statutory minimum capital ratios and the capital buffer requirements. The legal basis for this capital add-on, or Pillar 2 requirement (P2R), is Art. 16 of Council Regulation (EU) No. 1024/2013 conferring specific tasks on the European Central Bank concerning policies relating to the prudential supervision of credit institutions. The decision of the ECB requires Volkswagen Bank GmbH to satisfy, at a consolidated level, a total SREP capital requirement (TSCR) of at least 10.25% and a Pillar II requirement of 2.25%. The Pillar 2 requirement calls for the provision of CET1 of at least 56.25%. The remainder of the Pillar 2 requirement can be met with Additional Tier 1 (AT1) capital and Tier 2 (T2) capital.

Volkswagen Bank GmbH complied with all minimum requirements at all times in the reporting period, both at individual bank level and at consolidated level.

Structure of Own Funds

DISCLOSURE OF OWN FUNDS

The obligation to disclose own funds with the aim of increasing market discipline is derived from the CRR disclosure requirements. Disclosure of own funds and own funds requirements allows market participants to gain an insight into Volkswagen Bank GmbH's risk profile and capital adequacy.

The own funds in accordance with Article 72 of the CRR consist of Common Equity Tier 1 capital and Tier 2 capital. No additional Tier 1 capital has been issued by Volkswagen Bank GmbH or any of the group entities included in the prudential scope of consolidation.

Volkswagen Bank GmbH is currently not utilizing the "quick fix" regulatory transitional provisions governing the initial effects from first-time application of IFRS 9 under Article 473a of the CRR. The disclosures on own funds and the capital and leverage ratios take account of the full impact of the introduction of IFRS 9.

Similarly, Volkswagen Bank GmbH does not apply the "quick fix" transitional provisions under Article 468 of the CRR. Consequently, the disclosures on capital and leverage ratios reflect the full impact of the unrealized gains and losses measured at fair value through other comprehensive income.

COMMON EQUITY TIER 1 CAPITAL

Common Equity Tier 1 capital primarily consists of equity reported in the balance sheet as defined in IFRS. In turn, the equity reported in the balance sheet is composed of ordinary share capital and disclosed reserves. Volkswagen Bank GmbH's share capital is fully paid up and unrestricted. However, the wording of the profit-and-loss transfer agreement (PLTA) between Volkswagen Bank GmbH and Volkswagen AG was not accepted by the ECB. Accordingly, since the reporting date on March 31, 2022, it has temporarily not been possible for the ordinary share capital of €318.3 million to be recognized as Common Equity Tier 1 capital. In order to fulfill the CRR recognition criteria free of any doubt, the wording of the PLTA was revised and these revisions submitted for approval to the Annual General Meeting of Volkswagen AG in May 2023. As the revised PLTA was entered in the trade register on July 21, 2023, the ordinary share capital is recognized as Common Equity Tier 1 capital again as of the reporting date on September 30, 2023.

The disclosed reserves consist of the capital reserves and retained earnings. Moreover, Common Equity Tier 1 capital includes retained profits which have not yet been approved and are not tied to planned dividend payouts or foreseeable expenses (e.g. tax expenses). A special reserve for general banking risks recognized by Volkswagen Bank GmbH in accordance with section 340g of the *Handelsgesetzbuch* (HGB – German Commercial Code) is reported in the eligible disclosed reserves. The increase of €365.3 million in Common Equity Tier 1 capital over December 31, 2022 is primarily due to the renewed recognition of the ordinary share capital of €318.3 million. In addition, the deduction from Common Equity Tier 1 capital for non-performing exposures declined by €37.1 million compared to the end of the year.

TIER 2 CAPITAL

Tier 2 capital comprises long-term subordinated liabilities, reduced by amortization in accordance with Article 64 of the CRR.

The subordinated liabilities, which are subject to interest at market rates, have original maturities of 20 years and are due for settlement no later than 2024. Some of the liabilities are subject to a contractual call right by Volkswagen Bank GmbH if certain trigger events occur. However, in accordance with Article 78 of the CRR, this right can only be exercised with the prior permission of the supervisory authorities. The investors do not have any call rights.

The decline in Tier 2 capital compared to December 31, 2022 is due to amortization in accordance with Art. 64 of the CRR.

DISCLOSURE OF OWN FUNDS REQUIREMENTS AND RISK-WEIGHTED EXPOSURE AMOUNTS

The basis for the provisions concerning own funds requirements is formed by the regulatory provisions contained in Article 92 of the CRR. In this connection, it is necessary to calculate total risk exposure, which is derived from the calculation of the risk-weighted assets (RWA) for the credit risk including the counterparty credit risk as well as operational risk, market risk and for the credit valuation adjustments (CVA). The credit risk excluding the counterparty credit risk accounts for 92.2% of the total risk exposure amount, thus constituting the largest risk type.

The following table provides an overview of the breakdown of the total risk exposure amount and the own funds requirements. As Volkswagen Bank GmbH is subject to a quarterly disclosure duty, the figures in the table refer to the current reporting period ending September 30, 2023 as well as the previous quarter ending June 30, 2023.

The credit risk excluding the counterparty credit risk stood at €48,515.5 million as of September 30, 2023 and was therefore up by €414.5 million over the previous quarter. Volkswagen Bank GmbH uses the Credit Risk Standardized Approach (CRSA) to quantify credit risks.

The increase in counterparty credit risk from €22.5 million to €36.4 million is chiefly due to the credit valuation adjustment (CVA) as well as customary business activities.

At €3,528.3 million, operational risk was unchanged over the previous quarter due to the application of the static principle. Volkswagen Bank GmbH applies the Standardized Approach in this connection.

Liquidity Risk

Responsibility for liquidity planning lies with the Treasury department of Volkswagen Bank GmbH and Group companies.

The expected liquidity flows of Volkswagen Bank GmbH are pooled and evaluated by Treasury. Daily liquidity requirements are calculated by Cash Management in the Treasury Back Office of Volkswagen Bank GmbH. Liquidity surpluses and shortfalls are eliminated by investing or raising cash with external banks as well as through ECB tenders.

CONCENTRATION OF LIQUIDITY AND FUNDING SOURCES

The Volkswagen Bank GmbH Group is funded largely through direct banking deposits and by capital market and asset-backed security programs. Volkswagen Bank GmbH also participates opportunistically in the ECB's targeted longer-term refinancing operations (TLTRO).

In addition to a broadly diversified range of funding, Volkswagen Bank GmbH has two main sources of funding: Deutsche Bundesbank (TLTRO) and sources within the Volkswagen Group (cash collateral and deposits from subsidiaries in its function as a house bank).

In addition to funding as such, the Volkswagen Bank GmbH Group pursues a central approach for creating liquidity reserves to ensure daily solvency and the observance of liquidity risk indicators and regulatory ratios (including LCR, NSFR) at all times.

DERIVATIVE EXPOSURES AND POTENTIAL COLLATERAL CALLS

Interest-rate and currency swaps are traded within the Volkswagen Bank GmbH Group and included in the calculation of the LCR. OTC derivative contracts are hedged via collateral for each individual counterparty. Derivatives handled by a central counterparty (CCP) are collateralized in the form of variation and initial margins.

Derivatives are expected to generate only minor liquidity effects.

CURRENCY MISMATCH IN THE LCR

In accordance with the Commission Delegated Regulation (EU) 2015/61 of October 10, 2014, the Volkswagen Bank GmbH Group is required to hold sufficient high-quality liquid assets (HQLA) in the corresponding currency within the following 30 calendar days to cover the net liquidity outflows calculated for the LCR report. A perfect match between the currency of the HQLAs and the denomination of the net liquidity outflows is not sought. Rather, HQLAs are held in the main currency as well as the regulatory currencies for strategic purposes. Corresponding fluctuations and currencies that are not identified as currencies to be bought are compensated for in euros via HQLAs.

DESCRIPTION OF THE DEGREE OF CENTRALIZATION OF LIQUIDITY MANAGEMENT AND THE INTERACTION BETWEEN THE INDIVIDUAL GROUP INSTITUTIONS

Within the Volkswagen Bank GmbH Group, the LCR is managed centrally by Group Treasury Volkswagen Bank GmbH. The HQLAs for the prudential scope of consolidation of the Volkswagen Bank GmbH Group are held centrally and also managed by Group Treasury.

Other items in the LCR calculation which are not included in the LCR disclosure template but which are considered to be relevant in view of the liquidity profile are planned liquidity inflows (e.g. ABSs or capital market issues) which are not classed as legal cash flows for LCR purposes.

The calculation of the liquidity coverage ratio (LCR), for quantitative information on the LCR, is based on simple averages of the end-of-month reports over the twelve months prior to the end of each quarter.

Changes in LCR over time

The quarterly averages for LCR are at a high level and significantly exceed the required minimum ratio of 100% on every reference date. HQLAs increased during the reporting period in the form of central bank balances and of LCR Level 1 securities. At the same time, there was an increase in outflows, while there were virtually no changes in inflows.
